

5

placing an apparatus of claim 5 adjacent to the active termite tube.

17. The method, as claimed in claim 16, further comprising the step of mounting the outer cover on a wall of the structure. 5

18. A method for controlling termites in the ground, comprising the steps of:

digging a substantially linear trench;

6

placing a body of an outer box with a length, width and thickness, into the trench, and wherein the length of the outer box is placed along the length of the trench and the width of the box is placed along the height of the trench;

placing the apparatus as recited in claim 1 in the outer box; and

securing a cover over the body of the outer box.
